### **Notes:**

~ Increase or decrease of less than 0.5%

All figures are rounded and include cathedrals.

As totals and percentage changes are calculated on unrounded figures they will not always agree with sums and percentages based on the rounded figures.

Since 1972 new electoral rolls have been prepared every 6 years and as a result new electoral rolls were prepared for 2002.

**Church attendance** levels over a typical month are calculated from a four week church attendance count over October

**Usual Sunday Attendance** figures are estimated differently across the dioceses. They are typically estimates by parishes of attendance on a 'normal' or usual Sunday
